System Implementation | Sharepoint Solution Architect and Developer | Project Consulting

IT systems architect and developer with extensive knowledge and understanding of frameworks and technologies. Experienced in implementing systems of varying complexity. Focused on solutions achieving the business goals of the project.

Areas of Expertise

- Azure portal administration
- Cloud application development
- SharePoint Solutions
- Database design
- BPMN/UML
- System Integration
- PowerBi/ SQL Report Server
- MS Project Server/Professional
- Analyzing and translating business requirements into technical specifications
- Creating use cases, user stories, and functional specifications

Professional Experience

Seven Dots sp. z o.o. - Co-founder, head developer 2009 -

- Lead developer of a complex system created on top of the SharePoint platform. Extensive modules covering warehouse interfacing, order management, invoicing, document generation, and management. Built and consumed APIs for systems including SAP, financial systems, and e-shops. Created data warehouses for data analysis and reporting using Power BI and SQL Reporting Services. The result was a business-critical system with high availability, failover mechanisms, automatic maintenance, and continuous monitoring.
- Architect and developer of a workflow/state machine system utilized in many systems of world and country-wide enterprise companies. Defined use cases and user stories and translated them to technical specifications including diagrams and flows. Created tests and descriptions of change requests. Provided analytical and technological insight to stakeholders. The module expanded rapidly, gaining trust and swiftly accommodating the needs of the client.
- Built development and release pipelines from repositories, delivering artifacts to the deployment team. The process included acceptance workflow, fallback procedure, and deployment monitoring.
- Creating data processing applications integrating with JIRA and data warehouses for MS Project solutions. Creating efficient database procedures and views enabling information flow from project managers to the board and stakeholders

Education and Certificates

- Lublin University of Technology. IT specialization: Software Engineering 2004 - 2009
- Warsaw University of Techlology IT (Student exchange program) 2006 - 2007
- MCPD: SharePoint Developer
- MCPD: Windows Azure Developer
- MCTS: .NET Data Access
- MCTS: .NET Service Communication Applications
- MCTS: SharePoint 2010

Skills & Interests
